About Us

“**Hong Thai**” Founded in 1988 by a management team with over 42 years of experience in the packaging industry, Hong Thai has a registered capital of over THB 100 million. Through continuous development, the company has grown to become one of the leading providers of comprehensive corrugated paper packaging design and manufacturing solutions.

With the specialized expertise of our team and state-of-the-art machinery, Hong Thai is capable of producing 2-, 3-, and 5-ply corrugated sheets in a variety of flute types, including B, E, BC, BE, and CE. Our Product range also includes Offset-printed laminated corrugated boxes, Corrugated packaging, paper egg trays, and Food Service Paper Packaging.

The company is committed to delivering quality in accordance with international standards, promoting sustainable development, and providing comprehensive services covering every stage—from design and production to after-sales service. We continuously invest in developing our people and upgrading our production technologies to ensure they remain modern and efficient, enabling us to effectively meet the diverse needs of customers across all industries.

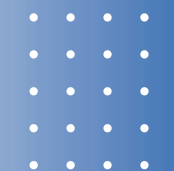

“**Hong Thai**”

We provide comprehensive, end-to-end paper packaging solutions to fully meet our customers' needs.

- State-of-the-art water-based FLEXO printing machines featuring both Pre-Print and Post-Print systems.
- OFFSET printing machines with corrugated board laminating machines.
- More than 15 DIE-CUTTING machines, including both ROTARY and FLATBED systems.
- 4 corrugated board production lines.

KRAFT PAPER SHEET

Kraft paper is made from chemical pulp produced through the Kraft Process, a method that uses chemicals and heat to separate wood fibers and convert wood into wood pulp. This process produces paper with excellent strength, durability, and high tear resistance.

CORRUGATED BOXES

Corrugated boxes are available in a variety of flute types and designs to suit different customer requirements. Common flute types include B, C, E, and BC, each offering different levels of strength and load-bearing capacity. For example, mailing boxes typically use B-flute or E-flute, while 3-ply and 5-ply corrugated boxes, including BC-flute constructions, are designed to support larger or heavier products.

Our Products Food Service Paper Packaging

PAPER-BASED FOOD PACKAGING

Our paper-based food packaging is a popular alternative to foam and plastic packaging. Made from 100% virgin paper pulp, it is resistant to both heat and cold and does not release harmful migration when exposed to heat, helping ensure consumer safety while supporting environmental sustainability.

OUR SERVICES | HONG THAI

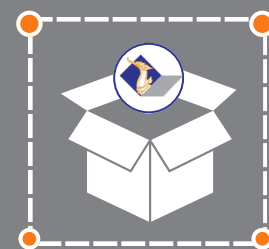

01

Client Brief & Online Ordering

Our ERP system enables us to respond quickly to customer requirements. With a secure server-based system, orders and production information can be efficiently managed, ensuring fast and accurate service.

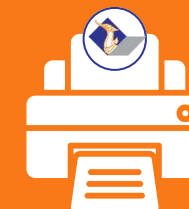

02

Packaging Design

Our packaging is designed using ArtiosCAD, a specialized structural packaging design software integrated with a UV Digital Flatbed system. We develop packaging structures and high-quality CMYK printing designs, including Half-Tone and White Ink. Profiles can be automatically adjusted to suit different substrates.

03

Printing & Finishing

Hong Thai offers a wide range of printing technologies to meet various product requirements. Our capabilities include 6-color offset printing and 6-color digital printing with White Ink, supported by die-cutting equipment for precise shapes and high-quality finishing.

04

On-Time Delivery

Our real-time planning system integrates production and delivery information online, enabling our team to efficiently manage production schedules and delivery plans to ensure that products are delivered on time.
